SUMMARY

Instructional designer and Chief of Staff working across AI-powered educational products, educator training, and user-centered design. Experienced in translating school partner needs and co-design feedback into product improvements, training, and classroom implementation plans. Holds an M.A. in Instructional Technology & Media from Teachers College, Columbia University, with a background in K–12 curriculum development and AI integration.

CORE COMPETENCIES

- **Product Strategy & Innovation:** End-to-end product development, roadmap prioritization, and data-driven optimization through A/B testing, behavioral analytics, and AI tool integration.
- **User Experience & Design:** UX/UI design, user-centered design (UCD), usability research, and front-end development (HTML, CSS, JavaScript); experienced owning full product and redesign cycles through execution, including AI-assisted development.
- **Strategic Leadership:** Cross-functional collaboration, stakeholder management, and resource alignment in B2B SaaS environments across product, engineering, and instructional teams.
- **Instructional Excellence:** Curriculum design and implementation, instructional design (ADDIE, SAM, Bloom's Taxonomy, Backward Design), pedagogical research, and project-based learning frameworks.

PROFESSIONAL EXPERIENCE

The Emancipation Group – Remote
Chief of Staff (Promoted from Product Manager and Learning Designer) 2026-Present

- Serve as Chief of Staff to the CEO and lead product management and learning design for an AI-powered K–12 game scoped for 900 students across four partner sites.
- Designed and led AI Praxis Instructional Design training around school partner pain points and created a pilot implementation plan to guide classroom use.
- Translate co-design feedback and instructional goals into product iterations, training content, and creative and technical specifications for external developers.

THEO (seed-stage startup) – Remote
UX Consultant (Product & Strategy focus) 2025

- Conceptualize the UX/UI MVP and a 3-year scalable roadmap, translating high-level investor objectives into a global product strategy centered on product-market fit and technical scalability.
- Architected a dual-interface UX system using generative AI to deliver real-time, data-driven tutor prompts alongside interactive, CCSS-aligned learning environments for students.
- Pioneered cross-functional workflows between UX, Engineering, and Curriculum teams to ensure high-fidelity translation of pedagogical theory into technical product features.

MeshEd - New York, NY
Curriculum and AI Advising Consultant (Promoted from AI and Education Intern) 2024-2026

- Conceive the organizational blueprint for AI integration across digital arts courses (grades 4-12) serving over 17,000 students across New York and Connecticut.
- Activate strategic EdTech partnerships by aligning MeshEd's instructional strategy with external platforms to expand R&D capacity and program reach.
- Redesigned the Documentary Filmmaking curriculum as an intern to pilot AI-assisted activities, synthesized findings that now inform the long-term program design and sustainable-use policies.

Public Broadcasting Service– Arlington, VA
Senior Content Development Associate (Promoted from Content Associate) 2021-2025

- Directed $5M+ multiplatform properties funded by DOE Ready to Learn grants, overseeing fiscal oversight, federal compliance, and competitive RFP procurement for properties reaching 13M+ monthly users.
- Orchestrated stakeholder relations between PBS, CPB, and 330+ member stations to ensure content met federal impact benchmarks, curriculum standards, and distribution requirements at scale.

EDUCATION
